

SYSTEMS AND METHODS FOR PROVIDING
A TRANSPORT CONTROL INTERFACE

Abstract of the Disclosure

[0262] A transport control interface may be provided
5 by an interactive television program guide application
to provide information, control or both for live and
recorded video programming. The transport control
interface may indicate to the user the time duration of
a live or recorded program and any time segments of the
10 program that have been recorded. The transport control
interface may automatically adjust the start and end
time shown to accommodate various factors such as
continuous viewing on a particular channel, multiple
recorded segments, buffer size, etc. Various
15 information associated with the live or recorded video
programming may be displayed in the transport control
interface.
